

DCT's
Dhempe College of Arts and Science
Miramar, Goa

- The college carries out segregation of waste before it is disposed from the college.
- The collected waste is then handed over to the municipality on regular basis in order to avoid the piling of waste.
- The waste is quantified and amount of waste disposed on regular basis is reported.
- Department of Biotechnology has newly started preparation of manure from the food waste generated in the department.
- The administrative staff has taken this initiative which clearly depicts the active participation of all stake holders in maintaining campus clean.
- College has a compost unit in its premises to prepare compost from generated garden waste, one of the best possible method for disposal.
- The compost generated from the pit will be used for gardening in the campus.
- Biohazard waste is decontaminated using autoclave. Then it is sealed in plastic bags. Then again re decontaminated. Labeled as biohazard waste and handed over to municipality.
- E-waste is collected and handed over to the company which is authorized for dismantling and recycling e-waste.
